A Platform for Semantic Technology Companies

Carmen Brenner (Master Thesis)

Problem

- Many companies provide/use semantic expertise
- Company information is distributed and diverse
- Most companies don't provide data in RDF

GOAL

- Create a company index
- Enable companies to manage their data

- A RDF dataset of 500+ companies
- The dataset includes users, vendors and marketplaces.
- BigOWLIM with Forest interface

Semantic Technology Companies

Zemanta
Zemanta is a revolutionary new platform for accelerating on-line content production for any web user. Any user-created text (a blog post, article or web page) is directly read by Zemanta, which recognizes all contextual content...
