

STI Summit

John Domingue

STI Board Meeting, Heraklion, Crete, May 2011

- Every two years STI International will hold a Semantic Summit organized by the STI Fellows for the STI Board and selected Junior STI members. STI Semantic Summits will be intellectually, socially, and geographically stimulating and will address a small number of open scientific and domain or industry challenges of strategic importance to STI and to the Semantic Technology Community. They will be forward looking and will attempt to better understand the challenges and to set directions for STI Members, STI, and the Semantic Technology Community.

- Conference Chair
 - John Domingue
- PC Chairs
 - Michael Brodie
 - Mark Greaves
 - Jim Hendler

Wednesday, July 6, 2011 - Friday, July 8, 2011

- Riga, Latvia
